

U.S.S.N. 10/709,750

3

LC 0153 PUS

Please Amend Paragraph 16 of the Specification As Follows:

Referring not to Figures 1 and 2 which are an illustration of an automotive seat assembly 10 in accordance with the present invention. The automotive seat assembly 10 is illustrated in limited embodiments, however, a plurality of modifications will become obvious to one skilled in the art in light of the present disclosure. The automotive seat assembly includes an automotive seat element 12 comprised of a seatback element 14 and a seatbase element 16. The seatback element 14 ~~12~~ is rotatably engaged to the seatbase element 16 for storage. The seatback element 14 ~~12~~ is commonly mounted to a seatbase track 18 to allow for positional adjustment once installed in an automobile.
